BIOGRAPHICAL INFORMATION

Frank Rattray Lillie was born in Toronto, Canada and attended the University of Toronto as an undergraduate. He moved to the United States and became a fellow at Clark University under the tutelage of Charles O. Whitman. Lillie received his doctorate in zoology from the University of Chicago in 1894. Lillie was an important pioneer in the field of embryology, including discovering the mechanisms causing free-martins.

Lillie first came to the Marine Biological Laboratory in 1891 to conduct summer research on embryology. Lillie went on to serve as Assistant Director of the MBL under Whitman from 1900-1908, Director of the MBL from 1908-1925 and President of the MBL Corporation from 1925-1941. Lillie was one of the Directors of the MBL Embryology course from its first year in 1893 through 1903. He was also instrumental in the founding of the Woods Hole Oceanographic Institution.
