Collection PC-MBL-Copeland/Bloom, Accession #2004-02

The following pictures were obtained by Gene Copeland from a resident photographer at the MBL in the late 1930's to early 1940's (probably Berlin Messter, Kine-Optik Photo). Dr. Copeland gave his set to Sydney Craig, III, upon his retirement around 1974. Dr. Craig "loaned" them to the Stazione de Napoli in Italy from 1979-1998. In 1998 Dr. Craig begged them back and gave them to the MBL through Kerry Bloom in May 2000. There are 3x5 1/2 black and white photographs of resident or visiting scientists at the MBL. Many of the photos are signed.
